

IMMUNIZATION RECORD - APPLICANTS UNDER 16 YEARS OF AGE

In Canada it is a provincial requirement that all children attending school to appropriately immunized before school entry. In order to assist in the school entry and assist in the health of immigrant children, it is strongly recommended that a record of immunizations received prior to immigration to Canada be created and certified before leaving for Canada.

This form - Immunization Record Form - wil be issued by the immigration/visa officer handling the immigration application. It is the applicant’s responsibility to have the form completed and certified by a qualified health professional before departing for Canada. This form should be presented to the appropriate provincial health authority before the child registers for school. It is recommended that the original immunization record be retained by the individual in case of secondary migration.

To be completed and certified for Immigration Applicants to Canada under 16 years of age. Please enter date of administration in appropriate area. Where not administered, please mark “N.A.”

Family Name Given Name(s) Day/Month/Year

Table with columns for immunization types (DIPHTHERIA, PERTUSSIS, TETANUS, POLIO, MUMPS, MEASLES, RUBELLA, HAEMOPHILUS INFLUENZA B, B.C.G., OTHER) and rows for PRIMARY (1st, 2nd, 3rd) and BOOSTER (4th, 5th) administrations.

I hereby certify that this is a true record of the immunizations received by the above-named.
